

WD Scorpio[®] Blue[™] SATA/PATA Hard Drives

Load it up and
take it with you

Massive capacity

Low power consumption

Ultra-cool and quiet

With capacities up to an amazing 1 TB, WD Scorpio Blue SATA and PATA 2.5-inch hard drives offer high-performance and low-power use for portable digital devices of all kinds.

PUT YOUR LIFE ON IT[®]

WD Scorpio Blue

SATA/PATA Hard Drives

Product Features

Massive capacity

Whether they are in an external drive or a notebook computer, WD Scorpio Blue SATA drives continue to offer the highest capacity for space-hungry operating systems, like Windows Vista®, with plenty of room left over for photos, music, and video. A slight increase in overall drive height on the 750 GB and 1 TB models has enabled 2.5-inch drives to achieve capacities once thought impossible.*

Quiet

In a notebook drive, silence is golden. WD's exclusive WhisperDrive™ combines state-of-the-art seeking algorithms to yield one of the quietest 2.5-inch hard drives on the market. These algorithms also optimize the way a drive seeks for data, which significantly improves power consumption. So now silence (and longer battery life) is golden.

Reliable and rugged

WD's ShockGuard™ technology protects the drive mechanics and platter surfaces from shocks. WD's SecurePark™ parks the recording heads off the disk surface during spin up, spin down, and when the drive is off. This ensures the recording head never touches the disk surface resulting in improved long-term reliability due to less head wear, and improved non-operational shock tolerance.

Fast and efficient

Ultra-fast 3 Gb/s SATA interface speed yields performance fit for demanding mobile applications.

Tested for compatibility

We perform tests on hundreds of systems and a multitude of platforms in our FIT Lab™ and Mobile Compatibility Lab to give our customers confidence that our drives will work in their systems.

*750 GB and 1 TB models are 12.5 mm high and may not be compatible with all notebook systems. Consult system specifications for maximum allowable drive height before attempting to install.

As used for storage capacity, one megabyte (MB) = one million bytes, one gigabyte (GB) = one billion bytes, and one terabyte (TB) = one trillion bytes. Total accessible capacity varies depending on operating environment. As used for transfer rate or interface, megabyte per second (MB/s) = one million bytes per second, and gigabit per second (Gb/s) = one billion bits per second.
