Camera-MP3 Sunglasses

Hawkeye

Product introduction

- Imagine you are backpacking through a beautiful landscape and you want to capture everything you see. With the New Universe video sunglasses you can make instant video & photos by looking through the eyepieces. These top of the range, lightweight sunglasses with UV400 polarized flip up lens are ideal in situations where you do not have space or time to carry heavy equipment. Think cross-country ski trips, nordic walking, mountain biking or holidays. They can also be used discretely in surveillance/spy operations.
- Within a stylish frame, the video sunglasses incorporate a top quality Video record & camera and 8GB flash memory, all neatly hidden away from the naked eye. No one will know your trendy sunglasses are actually a video recorder & camera!
- The camera captures amazing 3.2 megapixels images at a resolution of 2048*1536 & Video recorder also built- in 0.69 megapixels images at a resolution of 960x720. Besides taking photos you can also enjoy your favourite music via MP3 playback. The built-in earbuds provide convenient listening and can be hooked out of the way when not in use. The sunglasses are supplied with a RF remote control for easy, instant photo shooting, 8GB built-in flash memory, rechargeable battery and a USB 2.0 interface for data upload, download and recharging.
